### Circular Letter to Maritime Registrars, Ship Owners and Ship Operators

#### Maritime Circular No. MC/88/19

DATE: 30 JULY 2019

### JOINT CONCENTRATED INSPECTION CAMPAIGN ON EMERGENCY SYSTEMS AND PROCEDURES BY PARIS MOU AND TOKYO MOU

The purpose of this Maritime Circular is to share a Press Release from the Member Authorities of the Paris and the Tokyo Memorandum of Understanding on Port State Control (MoU) released on 29<sup>th</sup> July 2019, which informs about an intention to launch *a Joint Concentrated Inspection Campaign (CIC) on Emergency Systems and Procedures.* 

The vast majority of Port State Control Regimes set a high priority on being prepared for emergencies, as deficiencies with Emergency Systems and Procedures have remained among the top five categories of PSC findings for many years. This is why Paris MOU and Tokyo MOU have agreed to carry out the Joint Concentrated Inspection Campaign on Emergency Systems and Procedures. This CIC will also be followed by Black Sea MoU, Mediterranean MoU, Indian MoU, Riyadh MoU and Vina del Mar MoU.

The inspection campaign will be held for three month, commencing from the 1<sup>st</sup> September 2019 and ending on the 30<sup>th</sup> November 2019. The campaign will target all vessels, regardless of type, with a purpose to insure that ships are capable of responding to emergency situations; that all necessary safety measures are taken by responsible stakeholders; that all installed emergency systems are properly operated and managed; and that crew members are well familiar with the action plan in case of emergency.

During the period of the campaign a vessel will be inspected only once under this CIC. To assess vessels' compliance Port State Control Officers will use a Questionnaire of eleven questions, as attached to the Press Release. In addition, Port State Control Officers may ask for a drill to be carried out, as crew training on emergency procedures is also a related issue.

If a deficiency is found during the inspection, the Port State Control may record the deficiency and instruct it to be rectified within a certain time, or to detain the vessel until the serious deficiencies are rectified. In case of a detention, it will be recorded in the monthly lists of detention on the Paris MoU and the Tokyo MoU websites.

This Administration would like to draw the attention of shipowners and ship operators to the agreed campaign, and would like to encourage to take the necessary steps to familiarise

themselves with the CIC criteria and ensure that their vessels are prepared for campaign inspections. Shipowners and ship operators are also advised to assist their shipboard teams in preparing for the inspections. In addition, this Administration recommends contacting the relevant classification society for more detailed information on typical survey procedures related to Emergency Systems and Procedures.

If you have any questions on this matter, please do not hesitate to contact us.

Yours truly,

 $\left( \right)_{\Lambda_{1}}$ 

Liam Ryan International Registrar of Shipping and Seamen

26 July 2019

## LAUNCH OF JOINT CONCENTRATED INSPECTION CAMPAIGN ON

## EMERGENCY SYSTEMS AND PROCEDURES

The Member Authorities of the Tokyo and the Paris Memoranda of Understanding (MoU) on Port State Control will launch a joint Concentrated Inspection Campaign (CIC) on Emergency Systems and Procedures.

The purpose of the CIC on Emergency Systems and Procedures is to ensure that:

- ships are capable of responding appropriately and promptly to emergency situations in order to preserve human lives, protect the marine environment and minimize damages to ships;
- necessary measures are taken by responsible stakeholders, such as shipping companies and ship managers having a direct influence on the safety of ships and by raising their awareness of the importance of ship emergency systems;
- emergency systems installed on board can be properly operated and effectively managed in any emergency situations; and
- master and crew of the ship understand their assigned roles and duties in case of emergency and enhance their familiarity with the situations so that they can act immediately when circumstances arise.

This inspection campaign will be held for three months, commencing from 1 September 2019 and ending 30 November 2019. The campaign will target compliance on all vessels, regardless of type, and will examine specific areas related to the campaign in conjunction with the regular Port State Control inspection.

A ship will be subject to only one inspection under this CIC during the period of the campaign.

Port State Control Officers (PSCOs) will use a list of 11 questions to assess that equipment provided onboard complies with the relevant convention, the master and officers are qualified and familiar with operations relating to shipboard emergency

systems and that equipment is properly maintained and functioning.

Ships often operate in isolation and are engaged in long sea voyages where shore assistance for on-board emergencies may not be available. Therefore, the preparedness of emergency equipment, such as emergency power sources and fire pumps of ships, and the ability of the crew in responding to emergency situations, are critical factors in saving human lives, protecting the marine environment and minimizing damage to ships.

Both Secretary Hideo Kubota and Secretary-General Luc Smulders stated that "For many years, the number of deficiencies of the Emergency Systems has remained in the top five categories. The joint CIC on Emergency Systems and Procedures will not only raise safety awareness among the crew on safety related issues but will also enhance crew familiarisation with the emergency safety systems and procedures, contributing to the prevention of marine accidents in the oceans."

If deficiencies are found, actions by the port State may vary from recording a deficiency and instructing the master to rectify it within a certain period of time to detaining the ship until the serious deficiencies have been rectified. In the case of detention, publication in the monthly detention lists of the Tokyo and Paris MoU websites will take place.

It is expected that the Tokyo and Paris MoUs will carry out approximately 10,000 inspections during the CIC.

The results of the campaign will be analysed and findings will be presented to the governing bodies of the both MoUs for submission to the IMO.

#### Notes to editors:

rules on safety, pollution prevention and seafarers living and working conditions. It is a means of enforcing compliance in cases where the owner and flag State have failed in their responsibility to implement or ensure compliance. The port State can require deficiencies to be corrected, and detain the ship for this purpose if necessary. It is therefore also a port State's defence against visiting substandard shipping.

CIC on Emergency Systems and Procedures								
Insp	ection Authority							
Ship Name			IMO Number					
Date of Inspection Inspection Port								
QUESTIONS 1 TO 10 ANSWERED WITH A "NO" <u>MUST</u> BE ACCOMPANIED BY A RELEVANT DEFICIENCY ON THE REPORT OF INSPECTION.								
No.	Question		Yes	No	N/A			
Documentation								
1	Is the damage control plan readily available on board?							
Operating of Emergency system								
2*	Is the public address system capable of broadcasting emergency announcements?							
3*	For ships with water level detectors installed, is the system and alarm arrangements operational?							
<b>4</b> *	Is the steering gear system and its related emergency alarms operational?							
5	Does the muster list specify details in accordance with the requirements of SOLAS 1996-1998 Amendment, Chapter III, Regulation 37?							
6*	Does the emergency source of electrical power supply its power correctly to essential equipment for safety in an emergency?							
7a <sup>*</sup>	Where the emergence correct operational contract op	e emergency source of electrical power is a generator, is it in perational condition?						
7b*		cy source of electrical power is an accumulator eries and its switchboard in good condition?						
8*	Is the emergency fire	ire pump in full operational condition?						
Crew familiarization with emergency systems								
9*	Where a fire drill and to be satisfactory?	or abandon ship drill wa	as witnessed, was it found					
10*		or the above checked emergency equipment, are the relevant crews miliar with the operation?						
11	Has the ship been detained, as a result of the Inspection Campaign?							

<u>NOTE</u>

 If "NO" is selected, for question marked an "\*", the ship may be considered for detention.
Where there is no box in the N/A column, then either box "Yes" or "No" should be selected as appropriate.
